ISO 9001 QUALITY ASSURANCE

All Rotarex regulators are produced in Europe in accordance with international standards (ISO; CGA....) and are guaranteed to provide safe and reliable performance in operation. All locations are ISO 9001.

SPECIALTY GASES

SUPPLY BOARDS

CMC 280 CMC 380 P. 016

Technology	Diaphragm + Cartridge
Inlet Pressure	230 / 300 bar 3335 / 4350 psig
Outlet Pressure	10 / 16 / 35 / 50 bar 145 / 232 / 508 / 725 psig
Flow Rate Nm³/h (N_2)	Up to 30 Nm³/h (N_2) depending on outlet pressure
Material	Raw Brass Chrome-plated brass Stainless steel

CM 280 - CM 380 P. 018

Technology	Diaphragm + Cartridge
Inlet Pressure	200 / 300 bar 2900 / 4350 psig
Outlet Pressure	10 / 16 / 35 bar 145 / 232 / 508 psig
Flow Rate Nm³/h (N_2)	10 / 20 / 30
Material	Chrome-plated brass Stainless steel

SERIES MOD P. 020

Technology	Diaphragm + Balanced Valve
Inlet Pressure	200 / 300 bar 2900 / 4350 psig
Outlet Pressure	10 / 16 / 30 / 50 bar 145 / 232 / 435 / 725 psig
Flow Rate Nm³/h (N_2)	200 bar: 70 / 110 / 150 / 180 300 bar: 50 / 70 / 100 / 130
Material	Raw Brass Chrome Plated Brass

SERIES CM 104 P. 022

Technology	Diaphragm
Inlet Pressure	200 bar 2900 psig
Outlet Pressure	10 / 25 / 50 bar 145 / 363 / 725 psig
Flow Rate Nm³/h (N_2)	10 / 10 / 50
Material	Stainless steel

SERIES CM 454 P. 024

Technology	Piston
Inlet Pressure	200 / 300 bar 2900 / 4350 psig
Outlet Pressure	160 bar 870 / 2320 psig
Flow Rate Nm³/h (N_2)	10 / 30
Material	Chrome plated brass

SWITCHOVER BOARDS

SERIES CC 284 / 384 P. 026

Technology	Diaphragm + cartridge
Inlet Pressure	230 / 300 bar 3335 / 4350 psig
Outlet Pressure	10 / 16 / 35 / 50 bar 145 / 232 / 508 / 725 psig
Flow Rate Nm³/h (N_2)	Up to 25 Nm³/h (N_2) depending on outlet pressure
Material	Raw brass Chrome plated brass Stainless steel
Change Over	Automatic switch with manual reset

SERIES CC 283 / 383 P. 028

Technology	Diaphragm + cartridge
Inlet Pressure	230 / 300 bar 3335 / 4350 psig
Outlet Pressure	10 / 16 / 35 / 50 bar 145 / 232 / 508 / 725 psig
Flow Rate Nm³/h (N_2)	Up to 25 Nm³/h (N_2) depending on outlet pressure
Material	Raw brass Chrome plated brass Stainless steel
Change Over	Manual

SERIES CC 285 / 385 P. 030

Technology	Diaphragm + cartridge
Inlet Pressure	230 / 300 bar 3335 / 4350 psig
Outlet Pressure	1.5 / 5.5 / 10 bar 22 / 80 / 145 psig
Flow Rate Nm³/h (N_2)	10 Nm³/h (N_2) depending on outlet pressure
Material	Raw brass Chrome plated brass Stainless steel
Change Over	Automatic switch with manual reset with integrated line regulator

SERIES CEN P. 032

Technology	Diaphragm + Balanced Valve
Inlet Pressure	200 / 300 bar 2900 / 4350 psig
Outlet Pressure	10 / 16 / 30 / 50 bar 145 / 232 / 435 / 725 psig
Flow Rate Nm³/h (N_2)	200 bar: 70 / 110 / 150 / 180 300 bar: 50 / 70 / 100 / 130
Material	Raw Brass Chrome Plated Brass
Change Over	Automatic switch with manual reset

SERIES TD 102 P. 034

Technology	Diaphragm
Inlet Pressure	200 bar 2900 psig
Outlet Pressure	10 / 25 / 50 bar 145 / 363 / 725 psig
Flow Rate Nm³/h (N_2)	10 / 10 / 50
Material	Stainless steel
Change Over	Automatic switch with manual reset

SERIES TD 202 P. 036

Technology	Diaphragm
Inlet Pressure	200 / 300 bar 2900 / 4350 psig
Outlet Pressure	10 / 16 bar 145 / 232 psig
Flow Rate Nm³/h (N_2)	10 / 10
Material	Chrome plated brass Stainless steel
Change Over	Automatic switch with manual reset

SERIES TD 502 P. 038

Technology	Diaphragm + Balanced Valve
Inlet Pressure	200 bar 2900 psig
Outlet Pressure	10 / 25 / 50 145 / 363 / 725 psig
Flow Rate Nm³/h (N_2)	50 / 50 / 100
Material	Chrome Plated Brass Stainless steel
Change Over	Manual

TECHNOLOGY OVERVIEW

SUPPLY BOARDS

A **supply board** is used in a central gas supply system in order to reduce the cylinder pressure to an appointed secondary pressure. The supply board will then supply a stable pressure to line regulators or points of use.

A supply board can be considered like a simplified switchover board (without the continuous gas supply from several high-pressure sources).

Most of our supply boards have 3 common inlets available. This avoids installation of extensions and increases safety of the installation.
Our products exist in raw brass, chrome plated or stainless steel. The installed regulators are coming from our standard product range.

TECHNOLOGY OVERVIEW (continued)

SWITCHOVER BOARDS

Rotarex switchover boards can make your source management easier. Our first target is to make your installation safer, easier-to-control and to help you improve cost productivity.

SAFETY:
- DUOBLOC: 4-6 cylinder connections possible w/o extension - to improve the global system tightness of the process and reduce leakage points. Also, with the DUOBLOC concept you can purge independently each side. The purge can also be collected.
- RELIEF VALVE: all supply and switchover boards are standardly equipped with a relief valve (one on semi-automatic version, 2 on fully automatic version).
- INVERTER (full automatic)/BYPASS DESIGN (semi automatic): Its design avoids gas flow into the other side.
- Dedicated pressure gauges (HP and LP). Contact gauges could also be mounted in order to connect to an alarm box.
- With installation of a gas monitoring system, you can easily check your gas consumption from your desk.

EASE OF HANDLING:
- Easy access of purging and isolation valve.
- Easy installation with all components pre-mounted on an Omega plate.
- All components for service are easily accessible.

LOWER OPERATING COSTS:
- A continuous gas supply to the process means less production interruptions or unplanned disruption to change gas cylinders.
- Larger cylinders together = fewer cylinders = lower rental charge, less transportation charge, better cylinder management.
- Grouping all cylinders in one location means also space saving in production area or in lab which are very expensive surfaces.

MANUAL SWITCHOVER BOARDS

A **manual switchover board** reduces the cylinder pressure to an appointed secondary pressure and insures gas supply from different high-pressure sources. It ensures a safe cylinder replacement.

When one high-pressure supply source is in service, the other is in reserve.

When the service source is empty, the operator must change the service side to the reserve side manually when changing the empty cylinder

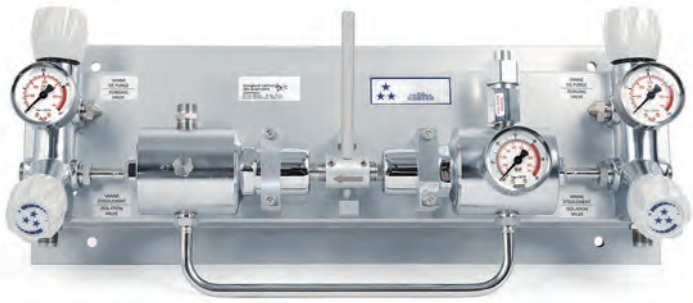
TECHNOLOGY OVERVIEW

AUTOMATIC SWITCHOVER BOARD WITH MANUAL RESET

An **automatic Switchover board with manual reset** is a system which provides a continuous gas supply to the piping system. One source of gas is used as the primary source, while a second source is held in reserve.

When the primary source reaches a predetermined pressure, the reserve supply automatically begins to supply gas to the system.

Once the Switchover occurs and primary source is replaced, the Switchover board is reset, such that the reserve supply supplying gas is now designated as primary source and the secondary source is now held in reserve. The empty cylinder can be replaced without interrupting the gas flow.



TECHNOLOGY OVERVIEW (continued)

PREMIUM QUALITY FOR BETTER PERFORMANCE

All our regulators are designed respecting the EN ISO 2503. The production of the regulator is certified according to ISO 9001. Also external audits from customers help us to improve continually our products. This strategy is also applied on our supplier base which is working very closely with us in order to reach new standards and new performance.

In order to fulfil the customer expectations regarding quality, Rotarex implements state-of-the-art quality management practices used in the automotive industry in order to stay Best In Class.

During the production of your regulator we have several control steps in order to provide you the best quality:

- Supplier Audit in order to control that they fullfill our standards
- 100% cleaning of all parts to O_2 standards
- Steaming of some specific components
- Measurement control of parts coming from the production
- 100% Helium leak test
- 100% functional test

Most of the supply and Switchover boards produced by Rotarex are designed for applications with gas purity up to 6.0 with a leak rate of 10^{-8} mbar l/s of helium.

FLOW MEASUREMENTS

Flow curves are based on the ISO EN 2503 Norm. The nominal flow are specified for the nominal inlet pressure with the regulator set at the nominal outlet pressure. The outlet flow will then decrease when the regulator is set at a lower outlet pressure than the nominal one.

For specific applications, do not hesitate to contact us to get the exact flow at the designed values.

SERVICE

In order to prevent possible contamination, we recommend that the operator performs a purging after the cylinder change. This maintenance step will help remove moisture, air and other impurities from the system before introduction of gas into the process. This maintains a constant purity in the circuit.

For some products like our supply/ Switchover boards, it is recommended to perform an annual maintenance in order to prevent wearing of some components. Our customer service team remains at your disposal to supply special spare parts.

SAFETY

All products are tested under pressure and also leak-tested before shipment. Our high pressure regulators are also equipped with relief valves in order to prevent any damage of the regulator.

Important notice: the relief valve fitted on our regulators will only protect the regulator in case of accident and cannot be used to protect the down stream process. When it is needed to protect the down stream process, use a CE relief valve on the pipe work.
It is also possible to collect the purge on our equipment in order to avoid any gas dispersion in the atmosphere when using toxic gas.

TECHNOLOGY OVERVIEW (continued)

PRESSURE REGULATOR TECHNOLOGIES

Rotarex Supply Panels and Switchover Panels use 3 main pressure regulator technologies to achieve a stable and reliable pressure regulation:

BALANCED VALVE

- Best-in-class pressure stability
- Minimizes the effect of inlet pressure fluctuations on outlet pressure
- Increases regulator lifetime and reduces cost of ownership by reducing seat effort
- Diaphragm technology only

DIAPHRAGM

- Our most-used technology (cylinder regulation, line, supply panel...)
- Compact design
- Good precision

PISTON

- Stable outlet flow
- Used for regulator where the pressure outlet is close to the inlet pressure

BALANCED VALVE TECHNOLOGY

Our **Balanced-Valve Technology regulator** gives you dual stage regulator performance in a single stage design. Due to its proprietary design, it is able to balance the internal forces within the regulator and compensates for the pressure fluctuation on the inlet. It provides a constant outlet pressure like a dual stage regulator but with a lower total ownership cost.

Switchover boards equipped with this technology don't need any line regulator afterwards and can be connected directly to the application.

TECHNOLOGY OVERVIEW (continued)

CARTRIDGE REGULATOR

Superior technical performance with cartridge technology:
- Better outlet pressure stability due to the cartridge design. Outlet pressure remains stable despite any fluctuation of inlet pressure.
- Longer product life due to less impingement on the diaphragm.
- Compact design with reduction of dead volume (minimal purge requirements)
- Sintered inlet filter provides better filtration without restricting flow.

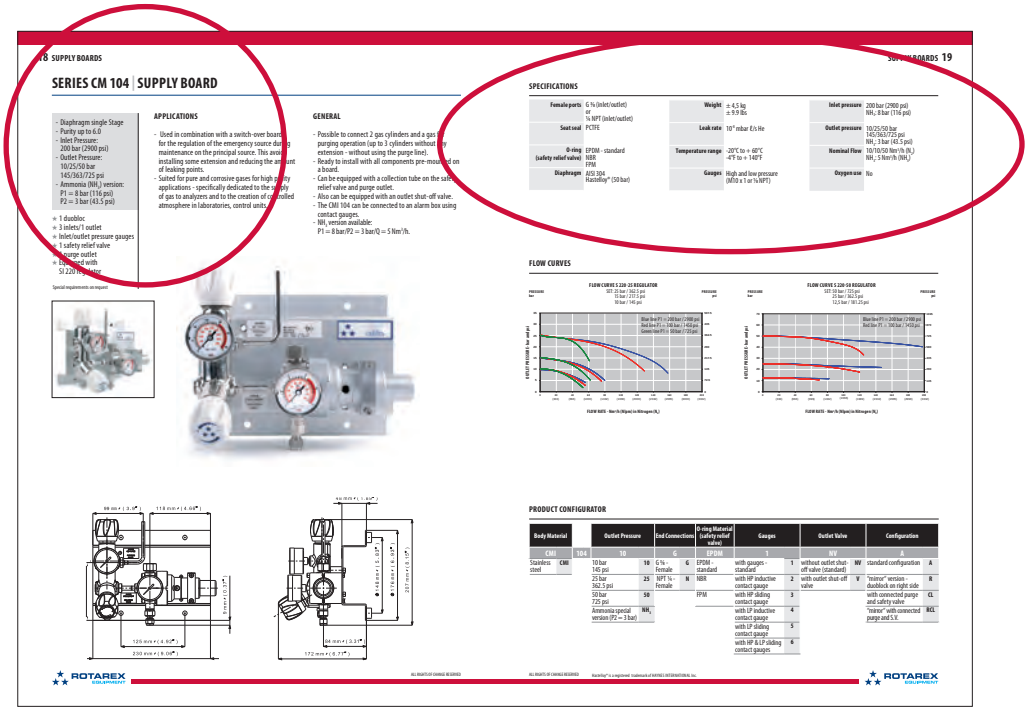
SELECTING THE RIGHT SUPPLY SYSTEM

To choose the right supply solution for your application and get the best results, you should identify the following technical parameters:

TECHNICAL PARAMETER	EXAMPLE
Gas	Inert, flammable, oxidizing, corrosive, toxic
Purity	UHP, HP, industrial, medical, diving
Nominal inlet pressure	Bar or psig
Nominal outlet pressure	Bar or psig
Nominal flow (N_2)	Nm^3/h, Nlpm, Slpm or SCFM
Single stage or dual stage ?	Dual stage or BV Technology are needed where pressure stability is essential
Product	Regulator, point of use, supply board, switchover board
Material	Brass, chrome plated brass, stainless steel
Inlet connection	Country of use, standard, connection
Outlet connection	G ⅜, ¼ NPT, male, female, special
Gauges	Low pressure, high pressure, sliding, inductive
Safety device	Yes/no
Vacuum	Yes/no
Application	Food, electronic, medical, welding, industrial, diving…
Outdoor or indoor use	Environment
Temperature range	-20°C to +60°C / -4° F to +140°F
Atex use	Yes/no
Preset outlet pressure	If yes, which pressure ?
Marking	CE, TPED, PI

Each product page is designed to provide you the essential technical information at a glance:



SELECTING THE RIGHT SUPPLY SYSTEM (continued)

BODY MATERIALS

Most Rotarex Supply and Switchover Boards are available in stainless steel 316L or chrome plated brass, and on some models, raw brass or aluminium. Which material is best for your installation?

Stainless steel 316L: The recommended option for corrosive gases and high-purity applications due to its superior resistence, non-reactivity, exceptional durability and high-surface finish properties. It is compatible with most gas types and low-velocity oxygen applications.

Rotarex uses stainless steel type 316L, an austentic chromium nickel stainless steel containing Molybdenum. It offers:
- Exceptional corrosion resistance - particularly against sulfuric, hydrochloric; acetic, formic and tartaric acids, acid sulfates and alkaline chlorides
- resistance to pitting from chloride-ion solutions
- outstanding strength even at elevated temperatures

Chrome plated or Raw Brass: The most commonly used material for industrial and high velocity oxygen applications due to its cost effectiveness versus stainless steel, good strength, resistence and low-friction flow properties.

Need more information? You can find more detail about optional, materials on our website. Additionally, one of our material engineers would be happy to discuss the pros and cons of each option to help you choose the best solution.

www.rotarex.com

Gas Compatibility: Make sure the body material is compatible with the gas type you will be using. Consult the gas compatibility reference chart on page 62.

O-RING MATERIALS

For many regulators, a choice of O-ring materials is available:

EPDM:	Ethylene Propylene Rubber
NBR:	Nitrile Butadiene Rubber
FPM:	Fluorocarbon Rubber
PTFE:	Polytetrafluoroethylene (cartridge)

Gas Compatibility: Make sure the O-ring material is compatible with the gas type you will be using. Consult the gas compatibility reference chart on page 62.

INLET/OUTLET PRESSURES

Different models are designed for different inlet and outlet pressure performance. The available options are clearly indicated on each product page. Please specify which inlet and outlet pressure when ordering. We can also accommodate special requests.

PRESSURE GAUGES

Most Rotarex supply and switchover boards are equipped with a choice of pressure gauges. High Pressure and/or Low Pressure - and sliding or induction versions. Check the product configurator table on each product page.

SELECTING THE RIGHT SUPPLY SYSTEM (continued)

RELIEF VALVE

Relief valves are standard on most Rotarex supply and switchover boards as a safety best practice.

SEAL MATERIAL

For all cartridge regulators the seat seal is PCTFE which provides a wide chemical compatibility, good temperature resistance, and better dimensional stability than traditional seals.

DIAPHRAGM MATERIAL

All cartridge regulators are equipped with a Hastelloy® diaphragm, which is ideally adapted to high purity applications and is compatible with all types of gases , and has exceptional elasticity and high corrosion resistance. Consequently, this diaphragm outperforms traditional stainless steel diaphragms in terms of pressure stability and long cycle lifetime.

FILTER MATERIAL

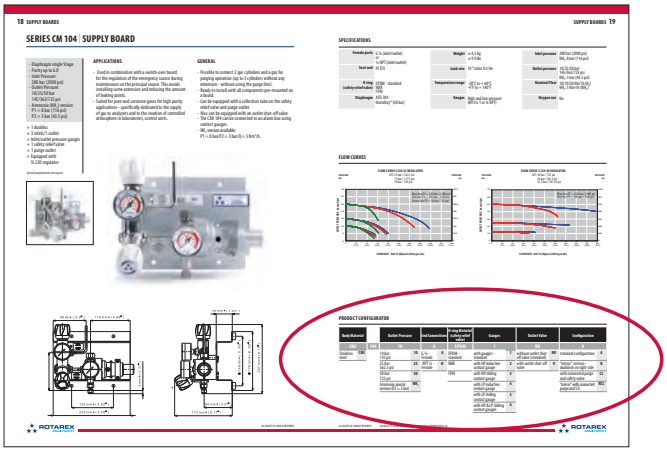
Rotarex cartridge regulators employ a Sintered Filter in 316L for the stainless steel and bronze for brass version.

The function of this filter is to protect the regulator against foreign particle coming from the gas or during installation. In any case a filter has to be installed on the line based on your cleanliness requirements.

OTHER PRODUCT OPTIONS

Some product solutions have additional options specific to their unique application, such as contact gauges, outlet valves, configuration… etc.

These options are clearly indicated on the product configuration table on each product page .



CLEANING

All products, regardless of gas application, are cleaned to remove all traces of residue and grease using the same procedures as for O_2 use. There is no need to specify special cleaning when ordering.

Important notice: the safety relief valve fitted on our regulators will only protect the regulator in case of accident and cannot be used to protect the down stream process. When it is needed to protect the down stream process, use a CE relief valve on the pipe work.

NOTES

SERIES CMC 280 / CMC 380 | SUPPLY BOARD

- Cartridge single stage
- Purity up to 6.0
- Inlet pressure:
  230 bar (3335 psig)
  or 300 bar (4350 psig)
- Outlet pressure:
  10 / 16 / 35 / 50 bar
  145 / 232 / 508 / 725 psig

★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 1 purge outlet
★ 0_2 compatible
(see technical data)
★ Regulator with
cartridge technoloy

Special requirements on request

APPLICATIONS

- Ideally suited for pure and corrosive gases for high purity applications dedicated to the supply of gas to analyzers and to the creation of controlled atmosphere in laboratories, control units, and for petrochemical applications where high flows are required
- Used in combination with a switchover board for the regulation of the emergency source during maintenance on the principal source. This avoids installing some extension and reducing the amount of leaking points

KEY FEATURES

- Ready to install with all components pre-mounted on a board.
- Best-in-class pressure stability with Cartridge Technology: the effect of inlet pressure fluctuations on outlet pressure are minimized. Cartridge Technology enables the delivery of a very stable outlet pressure and flow even with high flow line regulators.
- Cartridge technology increases regulator life and reduces ownership costs.
- Can be equipped with a collection tube on the relief valve and purge outlet.
- Can also be equipped with an outlet shut-off valve.
- The CMC 280 / CMC 380 can be connected to an alarm box using contact gauges.

SERIES MOD | SUPPLY BOARD

- Diaphragm single stage
- Balanced-Valve Technology
- Purity up to 5.5 (6.0 without the ball valve)
- Inlet pressure: 200 bar (2900 psig) or 300 bar (4350 psig)
- Outlet pressure: 10/16/30/50 bar 145/232/435/725 psig

★ 1 duobloc
★ 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 1 purge outlet
★ O_2 application compatible (see technical data)
★ Acetylene version available
★ Propane version available

Special requirements on request

APPLICATIONS

- Used in combination with a switchover board for the regulation of the emergency source during maintenance on the principal source. This avoids installing extensions and reduces the amount of leaking points.
- Suitable for the high flow supply of industrial gases except toxic and corrosive gases.

KEY FEATURES

- Possible to connect 2 gas cylinders and a gas for purging operation (up to 3 cylinders without any extension - without using the purge line).
- Ready to install: all components are pre-mounted on a board.
- Best-of-class pressure stability with Balanced-Valve Technology: the effect of inlet pressure fluctuations on outlet pressure are minimized. Balanced-Valve Technology enables the delivery of a very stable outlet pressure and flow even with high flow line regulators.
- Non-whipping filter improves safety of the operator during the cylinder replacement.
- Can be equipped with an outlet ¼ turn shut-off valve (Multi-turn valve with 30 bar or 50 bar version for oxygen use).
- Can be connected to an alarm box using contact gauges.
- Acetylene version available: P1 = 25 bar / P2 = 1 bar/Q = 6,5 Nm^3/h.
- For use with acetylene this product must be installed with a flash back arrestor complying with the standard EN 730 located downstream.
- Propane version available: P1 = 25 bar/P2 = 4 bar/Q = 10 Nm^3/h.

SERIES CM 104 | SUPPLY BOARD

- Diaphragm single Stage
- Purity up to 6.0
- Inlet Pressure:
  200 bar (2900 psig)
- Outlet Pressure:
  10/25/50 bar
  145/363/725 psig
- Ammonia (NH_3) version:
  P1 = 8 bar (116 psig)
  P2 = 3 bar (43.5 psig)

★ 1 duobloc
★ 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 1 purge outlet
★ Equipped with
SI 220 regulator
★ Only in stainless steel

Special requirements on request

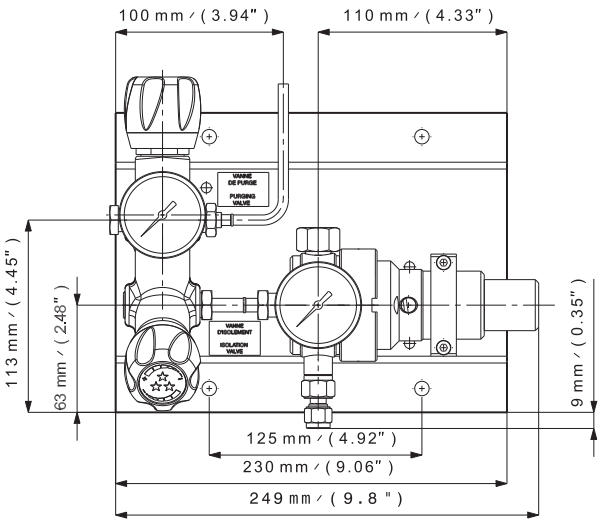
3 inlet ports

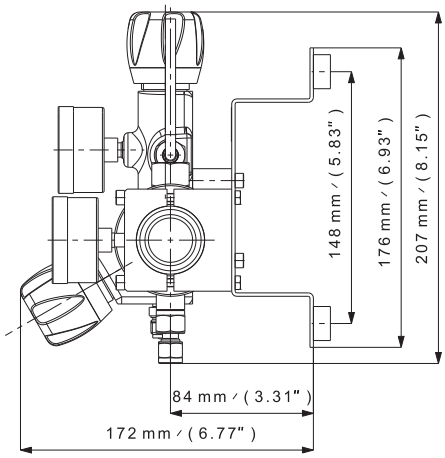
APPLICATIONS

- Used in combination with a switchover board for the regulation of the emergency source during maintenance on the principal source. This avoids installing some extension and reducing the amount of leaking points.
- Suited for pure and corrosive gases for high purity applications
- Specifically dedicated to the supply of gas to analyzers and to the creation of controlled atmosphere in laboratories, control units.

KEY FEATURES

- Possible to connect 2 gas cylinders and a gas for purging operation (up to 3 cylinders without any extension - without using the purge line).
- Ready to install with all components pre-mounted on a board.
- Can be equipped with a collection tube on the relief valve and purge outlet.
- Also can be equipped with an outlet shut-off valve.
- The CMI 104 can be connected to an alarm box using contact gauges.
- NH_3 version available:
  P1 = 8 bar/P2 = 3 bar/Q = 5 Nm^3/h.





SPECIFICATIONS

Female ports	G ⅜ (inlet/outlet) or ¼ NPT (inlet/outlet)	**Weight**	± 4,5 kg ± 9.9 lbs	**Inlet pressure**	200 bar (2900 psig) NH_3: 8 bar (116 psig)
Seat seal	PCTFE	**Leak rate**	10^{-8} mbar ℓ/s He	**Outlet pressure**	10/25/50 bar 145/363/725 psig NH_3: 3 bar (43.5 psig)
O-ring (relief valve)	EPDM - standard FPM	**Temperature range**	-20°C to + 60°C -4°F to + 140°F	**Nominal Flow**	10/10/50 Nm^3/h (N_2) NH_3: 5 Nm^3/h (NH_3)
Diaphragm	AISI 304 Hastelloy® (50 bar)	**Gauges**	High and low pressure (M10 x 1 or ⅛ NPT)	**Oxygen use**	No

SERIES CM 454 | SUPPLY BOARD

- Piston single stage
- Purity up to 6.0
- Inlet Pressure: 200 bar (2900 psig)
- Outlet Pressure: 160 bar (2320 psig)

★ 1 duobloc
★ 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 purge outlet
★ O_2 application compatible
★ SL 400 regulator integrated (CM 454)

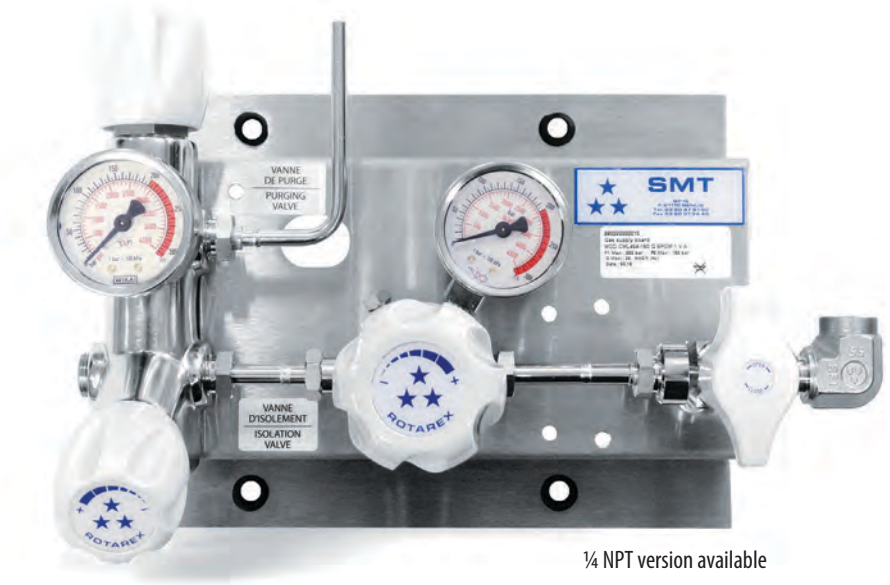
Special requirements on request

APPLICATIONS

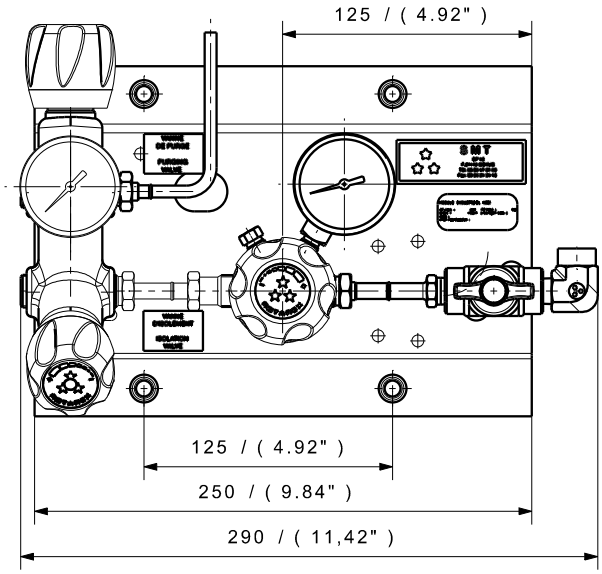
- Ideally suited for pure gases for high purity applications to put vessels under pressure and for leak detection and purge of pipe work.
- Used in combination with a switchover board for the regulation of the emergency source during maintenance on the principal source. This avoids installing some extension and reducing the amount of leaking points.

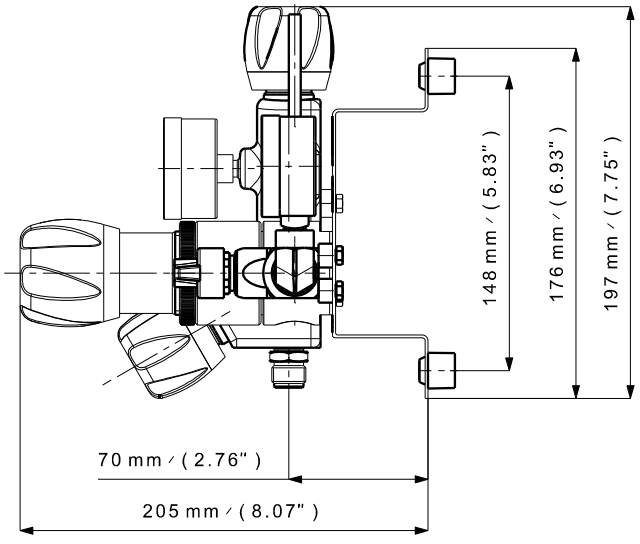
KEY FEATURES

- Adjustable outlet pressure
- Possible to connect 2 gas cylinders and a gas for purging operation (up to 3 cylinders without any extension - without using the purge line).
- Ready to install with all components pre-mounted on a board.
- Connectable to an alarm box using contact gauges.
- Equipped with a ¼ turn shut-off valve on the outlet.
- Collection tube available on the relief valve and purge outlet.
- Downstream regulation system can be decompressed by turning the hand wheel counter-clockwise.



¼ NPT version available





SPECIFICATIONS

Female ports	G ⅜ (inlet/outlet)	**Weight**	± 4,5 kg ± 9.9 lbs	**Inlet pressure**	200 bar 2900 psig

SERIES CC 284 / 384 | AUTOMATIC SWITCHOVER BOARD WITH MANUAL RESET

- Cartridge single stage regulators
- Diaphragm valves
- Purity up to 6.0
- Inlet pressure: 230 bar (3335 psig) or 300 bar (4350 psig)
- Outlet pressure: 10 bar (145 psig) 16 bar (232 psig) or 35 bar (508 psig)

★ 2x2 inlets/1 outlet
★ 1 relief valve
★ 2 purge outlets (optional)
★ Semi-automatic
★ Regulation done by 2 x SC281 cartridge regulator
★ O_2 application compatible (only 200 bar version)

Special requirements on request

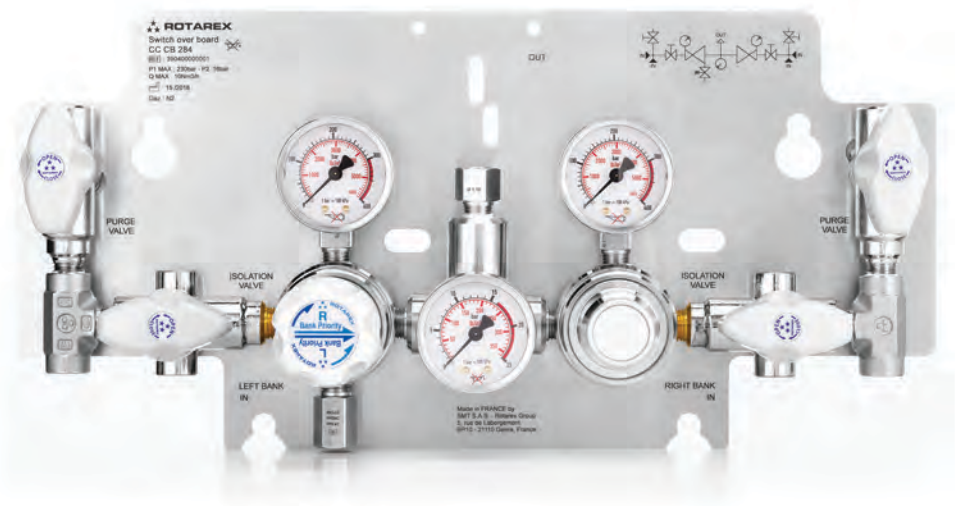
Optional connection with Alarm Box

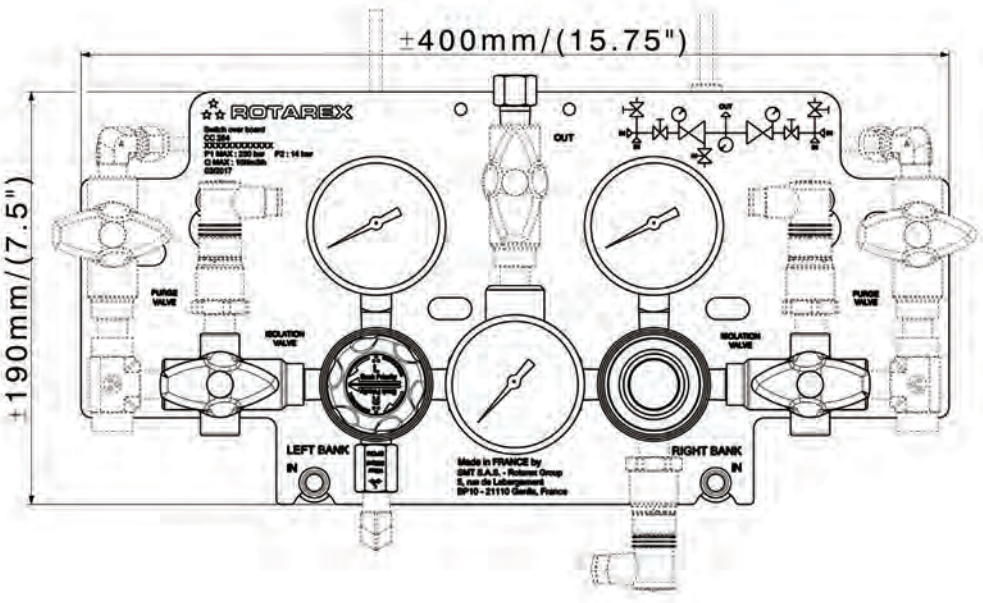
APPLICATIONS

- Ideally suited to insure gas supply from many high pressure sources of high purity non-corrosive gases with low flow (up to 25 Nm^3/h)
- Dedicated to the supply of gas to analyzers and to the creation of controlled atmosphere in laboratories, control units, and for petrochemical applications
- Thanks to the flexible and modular configuration of the switchover board: Possibility to manage inlet source, purging and outlet shut-off functions according to user's needs

KEY FEATURES

- The semi-automatic switchover board insures a continuous gas supply
- Ready to install thanks to pre-mounted components on a panel
- Can be equipped with a collection tube on the relief valve and purge outlet
- Easy handling thanks to visible technical drawings with key functionalities marked on the back plate
- Can be equipped with or without:
  - Outlet shut-off valve
  - Purging valve
- Using contact gauges or pressure sensor, the switchover board can also be connected to an alarm box to indicate the source status
- To connect up to 6 cylinders on each side you can use Rotarex extensions





Dotted lines = Full options

SERIES CC 283/383 | MANUAL SWITCHOVER BOARD

- Cartridge single stage regulators
- Diaphragm valves
- Purity up to 6.0
- Inlet pressure: 230 bar (2900 psig) or 300 bar (4350 psig)
- Outlet pressure: 10 bar (145 psig) 16 bar (232 psig), 35 bar (508 psig) or 50 bar (725 psig)

★ 2x2 inlets/1 outlet
★ 1 relief valve
★ 2 purge outlets (optional)
★ Semi-automatic
★ Regulation done by 1 x SC281 cartridge regulator
★ O_2 application compatible

Special requirements on request

Optional connection with Alarm Box

APPLICATIONS

- Ideally suited to insure gas supply from many high pressure sources of high purity non-corrosive gases with low flow (up to 25 Nm^3/h)
- Dedicated to the supply of gas to analyzers and to the creation of controlled atmosphere in laboratories, control units, and for petrochemical applications
- Thanks to the flexible and modular configuration of the switchover board: Possibility to manage inlet source, purging and outlet shut-off functions according to user's needs

KEY FEATURES

- The manual switchover board insures a regular and accurate gas supply with possibility to manually switch on a second source with the highest safety level
- Ready to install thanks to the pre-mounted components on the back-panel
- Can be equipped with a collection tube on the relief valve and purge outlet
- Easy handling thanks to visible technical drawings with key functionalities marked on the back plate
- Can be equipped with or without:
  - Outlet shut-off valve
  - Purging valve
- Using contact gauges or pressure sensor, the switchover board can also be connected to an alarm box to indicate the source status

SERIES CC 285 / 385 | AUTOMATIC SWITCHOVER BOARD WITH MANUAL RESET

WITH INTEGRATED OUTLET PRESSURE REGULATOR

- Cartridge single stage regulators
- Diaphragm valves
- Dual stage regulator integrated

★ 2x2 inlets/1 outlet
★ 2 relief valves
★ 2 purge outlets (optional)
★ Semi-automatic
★ Regulation done by 3 cartridge regulators
★ O_2 application compatible

Special requirements on request

Optional connection with Alarm Box

INNOVATION

Compact outlet pressure regulator with integrated pressure gauge
- Purity up to 6.0
- Inlet pressure: 230 bar (3335 psig) or 300 bar (4350 psig)
- Switching pressure: 10 bar (145 psig) 16 bar (232 psig) or 35 bar (508 psig)
- Outlet pressure: 1.5 bar (22 psig) 5.5 bar (80 psig) or 10 bar (145 psig)

APPLICATIONS

- Ideally suited to insure gas supply from many high pressure sources of high purity non-corrosive gases with low flow (10 Nm^3/h)
- Dedicated to the supply of gas to analyzers and to the creation of controlled atmosphere in laboratories, control units, and for petrochemical applications
- Thanks to the flexible and modular configuration of the switchover board: Possibility to manage inlet source, purging device, outlet regulation and shut-off functions according to user's needs

KEY FEATURES

- The semi-automatic switchover board insures a continuous gas supply without gas interruption
- Ready to install thanks to pre-mounted components on a panel
- Relief valve and purge outlet can be collected
- Easy handling thanks to visible technical drawings with key functionalities marked on the back plate
- Can be equipped with or without:
  - Outlet shut-off valve
  - Purging valves
- Using contact gauges or pressure sensor, the switchover board can also be connected to an alarm box to indicate the source status
- To connect up to 6 cylinders on each side you can use Rotarex extensions

SERIES CEN | SWITCHOVER BOARD

- Diaphragm single stage
- Balanced-Valve Technology
- Purity up to 5.5 (6.0 without the ball valve)
- Inlet pressure: 200 bar (2900 psig) or 300 bar (4350 psig)
- Outlet pressure: 10/16/30/50 bar 145/232/435/725 psig
- Acetylene version: P1 = 25 bar (362.5 psig) P2 = 1 bar (14.5 psig)
- Propane version: P1 = 25 bar (362.5 psig) P2 = 4 bar (58 psig)

★ 2 duoblocs
★ 2 x 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 2 purge outlets
★ O_2 application compatible

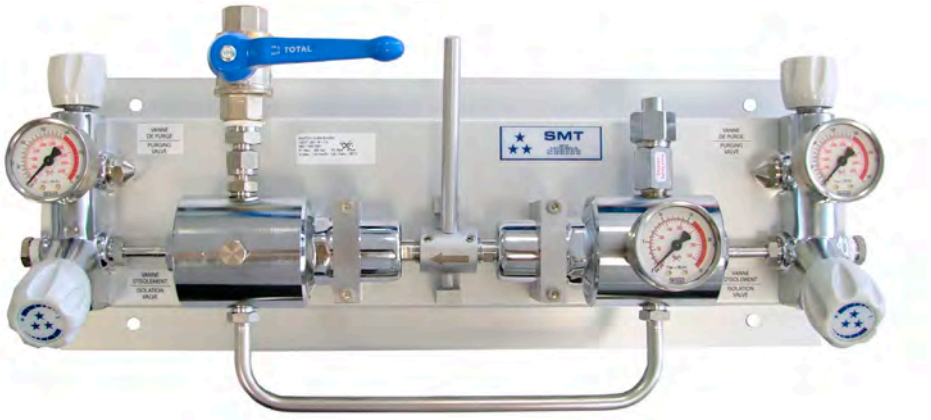
Special requirements on request

APPLICATIONS

- Suitable for the high flow supply of non-corrosive industrial gases when high flow are required like for plasma TIG and MIG cutting and welding applications.

KEY FEATURES

- Possible to connect 4 gas cylinders without any extension and a gas for purging operation (up to 6 cylinders without any extension - without using the purge line).
- No risk that a source flows into the other one.
- Exists also in an AUTOMATIC version (with 10 and 16 bar outlet pressure). This automatic switchover board does not need to be reset to allow reversal of the cycle.
- Ready to install with all components pre-mounted on a board.
- Best-of-class pressure stability with Balanced-Valve Technology: the effect of inlet pressure fluctuations on outlet pressure are minimized. Balanced-Valve Technology enables the delivery of a very stable outlet pressure and flow.
- Reduced seat effort increases life of the regulator and reduces the ownership cost.
- Non-whipping filter on bottom inlet improves safety of the operator during the cylinder replacement.
- Can be equipped with an outlet ¼ turn shut-off valve (Multi-turn valve with 30 bar or 50 bar version for oxygen use).
- Can also be equipped with a collection tube on the relief valve and purge outlet.
- Using contact gauges, the switchover board can also be equipped with an alarm box to indicate the source status.
- Special carbon dioxide CO_2 version available (inlet pressure 200 bar or 300 bar with maximal flow = 80m³/h)
- Special FDA compatible version available on demand
- Acetylene version available: P1 = 25 bar/P2 = 1 bar/Q = 6,5 Nm³/h
- Used with acetylene, this product must be installed with a flash back arrestor complying with the standard EN 730 located downstream.
- Propane version also available: P1 = 25 bar/P2 = 4 bar/Q = 10 Nm³/h



Automatic switch with manual reset
Chrome plated version

SERIES TD 502 | SWITCHOVER BOARD

- Diaphragm single stage
- Balanced-Valve Technology
- Purity up to 6.0
- Inlet pressure:
  200 bar (2900 psig)
- Outlet pressure:
  10/25/50 bar
  145/363/725 psig

★ 2 duoblocs
★ 2 x 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 2 purge outlets
★ O_2 application compatible
(brass only 200 bar version)

Special requirements on request

APPLICATIONS

- Ideally suited to insure gas supply from many high-pressure sources of high purity non-corrosive gases with high flow
- Dedicated to supply of gas to analyzers and to create a controlled atmosphere in laboratories, control units, and for petrochemical applications.

KEY FEATURES

- Possible to manage 4 gas cylinders without any extension and a gas for purging operation (up to 6 cylinders without any extension - without using the purge line).
- No risk that a source flows into the other one.
- Ready to install with all components pre-mounted on a board.
- The automatic switchover board does not need to be reset to allow reversal of the cycle.
- Best-in-class pressure stability with Balanced-Valve Technology: the effect of inlet pressure fluctuations on outlet pressure are minimized. The Balanced-Valve Technology enables the delivery of a very stable outlet pressure and flow.
- The BV Technology reduces the efforts on the seat to increase life of the regulator and reduce the ownership cost.
- Can be equipped with a collection tube on the relief valve and purge outlet.
- Can be equipped with an outlet shut-off valve.
- Using contact gauges, the switchover board can also be equipped with an alarm box to indicate the source status.

Automatic switch with manual reset

SERIES MOD | SUPPLY BOARD

- Diaphragm single stage
- Balanced-Valve Technology
- Purity up to 5.5 (6.0 without the ball valve)
- Inlet pressure: 200 bar (2900 psig) or 300 bar (4350 psig)
- Outlet pressure: 10/16/30/50 bar 145/232/435/725 psig

★ 1 duobloc
★ 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 1 purge outlet
★ O_2 application compatible (see technical data)
★ Acetylene version available
★ Propane version available

Special requirements on request

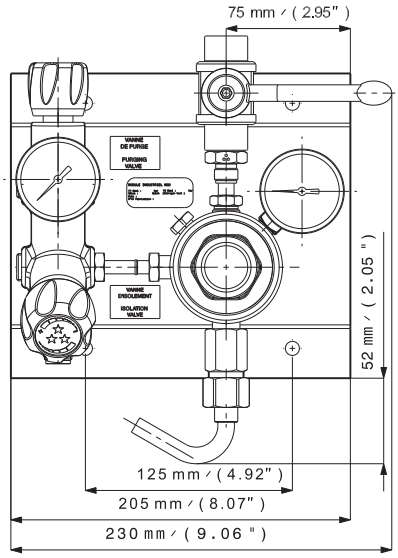
APPLICATIONS

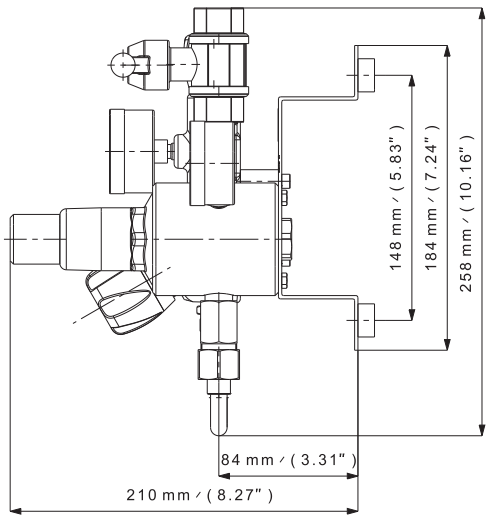
- Used in combination with a switchover board for the regulation of the emergency source during maintenance on the principal source. This avoids installing extensions and reduces the amount of leaking points.
- Suitable for the high flow supply of industrial gases except toxic and corrosive gases.

KEY FEATURES

- Possible to connect 2 gas cylinders and a gas for purging operation (up to 3 cylinders without any extension - without using the purge line).
- Ready to install: all components are pre-mounted on a board.
- Best-of-class pressure stability with Balanced-Valve Technology: the effect of inlet pressure fluctuations on outlet pressure are minimized. Balanced-Valve Technology enables the delivery of a very stable outlet pressure and flow even with high flow line regulators.
- Non-whipping filter improves safety of the operator during the cylinder replacement.
- Can be equipped with an outlet ¼ turn shut-off valve (Multi-turn valve with 30 bar or 50 bar version for oxygen use).
- Can be connected to an alarm box using contact gauges.
- Acetylene version available: P1 = 25 bar / P2 = 1 bar/Q = 6,5 Nm^3/h.
- For use with acetylene this product must be installed with a flash back arrestor complying with the standard EN 730 located downstream.
- Propane version available: P1 = 25 bar/P2 = 4 bar/Q = 10 Nm^3/h.

3 inlet ports





SPECIFICATIONS

Female ports	In: G ⅜ - Out: G ½ In: ⅜ NPT - Out: G ½

- Propane version: P1 = 25 bar (362.5 psig) P2 = 4 bar (58 psig)

★ 2 duoblocs
★ 2 x 3 inlets/1 outlet
★ Inlet/outlet pressure gauges
★ 1 relief valve
★ 2 purge outlets
★ O_2 application compatible

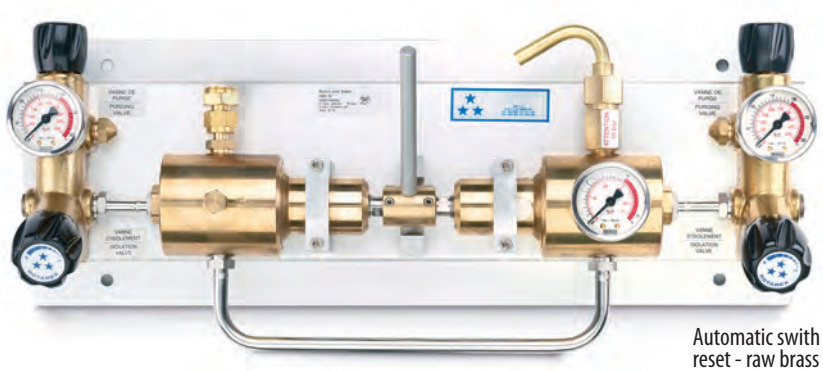
Special requirements on request

APPLICATIONS

- Suitable for the high flow supply of non-corrosive industrial gases when high flow are required like for plasma TIG and MIG cutting and welding applications.

KEY FEATURES

- Possible to connect 4 gas cylinders without any extension and a gas for purging operation (up to 6 cylinders without any extension - without using the purge line).
- No risk that a source flows into the other one.
- Exists also in an AUTOMATIC version (with 10 and 16 bar outlet pressure). This automatic switchover board does not need to be reset to allow reversal of the cycle.
- Ready to install with all components pre-mounted on a board.
- Best-of-class pressure stability with Balanced-Valve Technology: the effect of inlet pressure fluctuations on outlet pressure are minimized. Balanced-Valve Technology enables the delivery of a very stable outlet pressure and flow.
- Reduced seat effort increases life of the regulator and reduces the ownership cost.
- Non-whipping filter on bottom inlet improves safety of the operator during the cylinder replacement.
- Can be equipped with an outlet ¼ turn shut-off valve (Multi-turn valve with 30 bar or 50 bar version for oxygen use).
- Can also be equipped with a collection tube on the relief valve and purge outlet.
- Using contact gauges, the switchover board can also be equipped with an alarm box to indicate the source status.
- Special carbon dioxide CO_2 version available (inlet pressure 200 bar or 300 bar with maximal flow = 80m³/h)
- Special FDA compatible version available on demand
- Acetylene version available: P1 = 25 bar/P2 = 1 bar/Q = 6,5 Nm³/h
- Used with acetylene, this product must be installed with a flash back arrestor complying with the standard EN 730 located downstream.
- Propane version also available: P1 = 25 bar/P2 = 4 bar/Q = 10 Nm³/h



Automatic swith with manual reset - raw brass version

BA 12 | ALARM BOX

- Signal sent automatically for notifying gas shortage. The message is visual and acoustic
- Optional EX protection (installation outside Ex-area)
- Devices available in three versions: For 2, 6 and 10 pressure gauge

ALARM BOXES

★ 2/6/10 contacts
★ Ex Version

Special requirements on request

KEY FEATURES

- Detecting a drop in pressure when the gas bottle is empty
- Messages are displayed visually by LEDs and audibly buzzer
- Remote message with potential free contacts possible
- Inputs for magnetic spring contact and inductive contact pressure gauge are suitable. Only NC contacts for safety!
- Plastic case with IP65 seal for wall and panel mounting
- Cage clamp connection and pluggable
- Easy to configure when the device is closed

OPTIONS

- Intrinsically safe barrier for Ex environment (Isolating switching amplifier)
- 230V AC or 115V AC power supply

KEY ADVANTAGES

- Product flexibility : three versions available according to your process(2, 6 or 10 contacts)
- Potential-free output as change-over contact
- Group message and New value message
- Integrated LED allow visual information
- Integrated Buzzer for acoustic alarm

CEN EXT/TD EXT | EXTENSIONS

Left or right, 2 or 3 cylinders extension for supply board (CM or MOD series) and switchover board (TD or CEN series)

EXTENSIONS

★ For supply boards and switchover boards
★ 2 or 3 cylinders version

Special requirements on request

KEY FEATURES

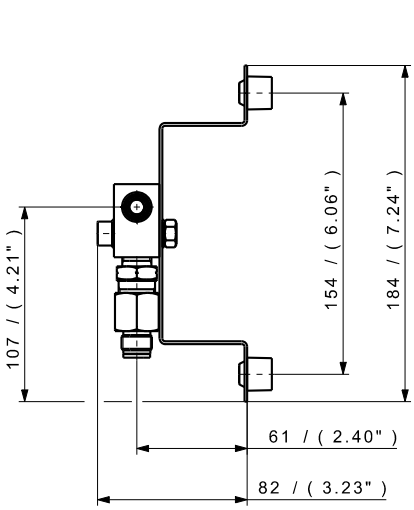
- High pressure header to connect cylinder batteries available for various gases
- 2 or 3 cylinder version
- Standard inlet: G ⅜ - Male
- Standard outlet: G ⅜ - Female
- With plate

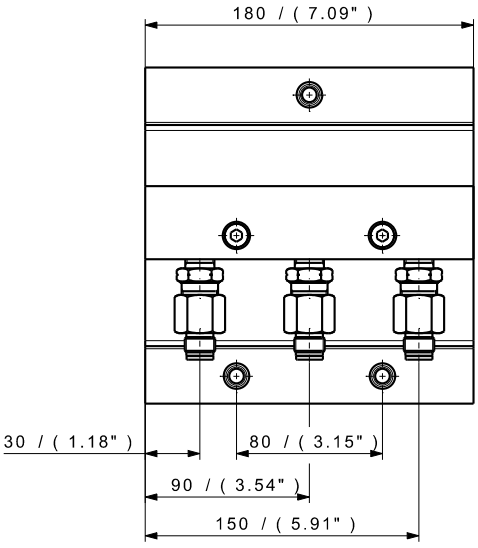
OPTIONS

- Flexible hose for connection with cylinders

CEN & MOD EXTENSION

TD & CM SERIES EXTENSION





SPECIFICATIONS

PIGTAILS

Straight or elbow pigtail ideally suited to connect CM series supply boards or TD series switchover boards to gas cylinders

PIGTAILS

★ high pressure
★ straight or elbow
★ stainless steel, electro polished

Special requirements on request

KEY FEATURES

- Cylinder connector according the following standard:
- AFNOR, DIN, NEN, UNI...
- Other connections: on demand
- Outlet connections: G ⅜ - Female
- Material: stainless steel, electro polished

OPTIONS

- Different outlet connection
- Shut off valve

FX 01 / FX 02 / FX 06 | FLEXIBLE HOSES

Flexible hoses for various pressures used for connecting supply boards, Switchover boards and other equipment at the source of gas supply

FLEXIBLE HOSES

★ high pressure
★ PTFE + stainless steel (FX 01)
★ stainless steel (FX 02 / FX 06)

Special requirements on request

KEY FEATURES

- Stainless steel hoses (FX 02 + FX 06)
- Stainless steel + PTFE hose (FX 01)
- Compatible with neutral and corrosive gases according to the hose type.
- The hose is composed of a stainless steel double braid, a stainless steel or PTFE inside, and end connections.
- The hose is standardly equipped with a stainless steel safety cable as a safety best practice.

OPTIONS

- Without safety cable version
- Elbow version

**with safety cable
NB.: If a cylinder connection is required, please specify the connection and gas type.

EXAMPLE

REF.: FX01 \ DN06 \ 1000 \ ADB6 \ UM¼ \ T \ C

is a hose with the following characteristics:
- PTFE tube, SS304L braid
- Length without adapters: 1000 mm
- Connections: 6 mm adapter for tube fitting on one side and ¼" male BSPT on the other side
- Safety cable

EXAMPLE

REF.: FX02 \ DN06 \ 1000 \ BS / 3 \ G6 \ B

is a hose with the following characteristics:
- SS316L tube, SS304L braid
- Length without adapters: 1000 mm
- Connections: elbow on the side of cylinder for a BS341-3 No. 3 Cylinder and on the other side G⅜ - Female w/ rotating nut
- Safety cable

DUOBLOC | 3 INLETS/2 OUTLETS MONOBLOCK VALVES

Monoblock valves with 3 common inlets and 2 manual and multi-turn shut off valves for various pure gases

MONOBLOCK VALVES

★ 200 bar or 300 bar
★ Multi-turn
★ 3 inlets/2 outlets

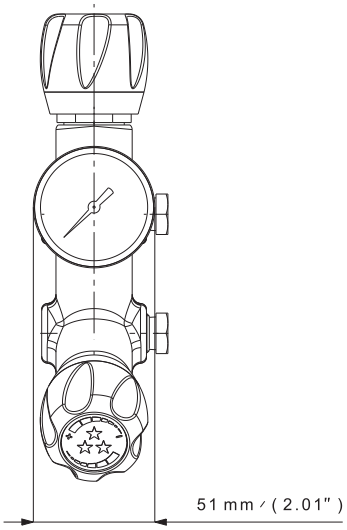
Special requirements on request

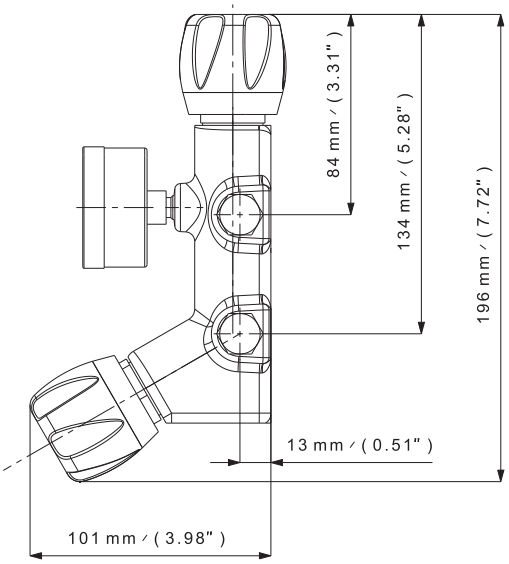
KEY FEATURES

- Purity up to 6.0
- Multi-turn version
- Raw brass, chrome plated brass or stainless steel
- 3 common inlets
- 2 manual shut off valves with non-rotating seat disc holder (brass version), with diaphragm (stainless steel version)
- 1 high pressure gauge
- Standard inlet/outlet: G ⅜ - Female
- Rear thread for panel mounting
- Stainless steel version only available in 200 bar

OPTIONS

- Various inlet/outlet connections including ⅜ NPT - Male, ¼ NPT - Female
- NBR or FPM O-ring
- Many inlet/outlet fittings available





SPECIFICATIONS

Female ports	G ⅜, ¼ NPT or ⅜ NPT (inlet/outlet)	**Weight**	± 1,3 kg ± 2.87 lbs	**Inlet pressure**	200 bar / 300 bar 2900 psig / 4350 psig
Seat seal	PA 6.6 (brass version) PCTFE (SS version)	**Leak rate**	3.10^{-7} mbar ℓ/s He	**Flow coefficient**	Cv 0.208, Kv 0,18 (main in) Cv 0.220, Kv 0,19 (lateral)
O-ring	EPDM - standard FPM	**Temperature range**	-20°C to + 50°C -4°F to + 122°F	**Multi-turn hand-wheel**	OK
Bottom tapered	OK			**Oxygen use**	OK (special O_2 version)

	300 bar (brass only) 4350 psig	**300**	Chrome Plated Brass	**L**	¼ NPT - Female (L&I version)	**N**	Right Inlets	**R**	FPM	Oxygen use	**O_2**
			Stainless steel	**I**	⅜ NPT - Female (L&I version)	**N3**					

SERIES VD | DIAPHRAGM LINE VALVE

- Low to high-pressure line valves for various pure gase
- High leak tightness through diaphragm sealing
- a consistent design for all versions

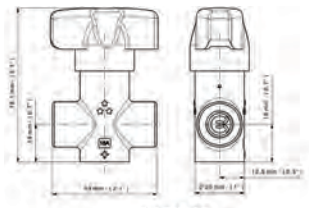
SHUT-OFF VALVE

★ From 50 to 300 bar inlet pressure
★ Diaphragm seal
★ ¼ turn handwheel
★ O_2 compatible (only with Brass version)

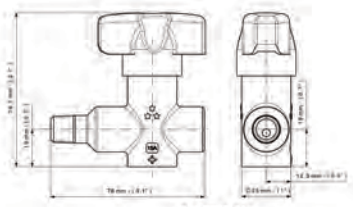
KEY FEATURES

- For gas purity up to 6.0
- Hastelloy® diaphragm for tightness and gas compatibility
- ¼ turn ergonomic handwheel
- Chrome-plated brass or stainless steel
- 3 versions : 50, 200 and 300bar inlet working pressure
- 3 orientations : female-female, male-female, female-male
- Available with 1/4NPT or G3/8 connections
- With rear threads for panel mounting

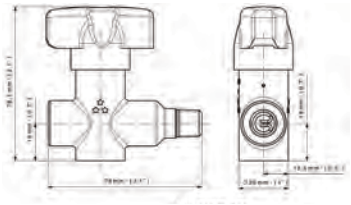
¼ NPT FF & G⅜" FF



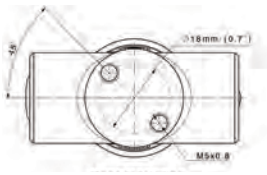
¼ NPT MF



¼ NPT FM



REAR MOUNTING



SPECIFICATIONS

Ports	¼ NPT : FF, MF or FM G⅜	**Weight**	310g	**Inlet pressure**	50 / 200 / 300 bar
Seat seal	PCTFE	**Leak rate**	10^{-8} mbar l/s He	**Flow coefficient (Kv)**	0,17 Kv / 0,2 Cv
Diaphragm	Hastelloy ®	**Temperature range**	-20° to +60 °C	**Oxygen use**	Ok up to 310 bar (brass version only)
Bottom tapered	OK 2x M5 at Ø18mm	**Seat orifice size**	Ø 4mm		

PRODUCT CONFIGURATOR

		Body Material		Inlet Pressure		Orientation		Connection		Handwheel	
V	D	B		50		FF		N		¼T	
		Chrome plated brass	B	50 bar	50	Female-Female	FF	¼NPT	N	¼ turn	¼T
		Stainless steel	S	200 bar	200	Male - Female (only with ¼NPT)	MF	G⅜	G		
				310 bar	310	Female - Male (only with ¼NPT)	FM				

GAS CYLINDER HOLDER

Designed for the storage of one or large number of gas cylinders in an appropriate area

- ★ Can be fixed permanently to the wall
- ★ Securely holds cylinder in place
- ★ Allows permanent designation of appropriate cylinder storage area
- ★ Delivered with a fixing belt
- ★ Many cylinder holders can be used together, side by side
- ★ Part number: 202500000007

Special requirements on request

NOTES

NOTES

A FULL LINE OF GAS CONTROL SOLUTIONS

COMPLETE SOLUTIONS FROM SOURCE TO PROCESS.

ROTAREX is helping engineers worldwide to get better gas results: from ultra high purity production and medical care facilities to industrial and LPG applications, as well as alternative energy vehicles, fire suppression, diving, aerospace, cryogenics, laboratory, petro-chemical and welding. ROTAREX applies almost 100 years of know-how and experience to custom design, develop and manufacture the high performance valves, regulators and fittings to suit your needs, all in one hand. Discover the difference ROTAREX can make in your world.
